

Wednesday Walk - Baroona Road Private Property – 22 October 2014

Baroona Road runs off the Monaro Highway south of Michelago. The property that we visited was mainly grassland and open woodland and had a creek running through it with a nice rocky gorge area. We walked first in the grassy area with morning tea beside the creek before climbing through the gorge to a rocky high point for lunch with magnificent views to the Clear Range. We saw many things of interest and a lot of things flowering. There were some lovely old trees - *Eucalyptus melliodora*, *E. bridgesiana*, *E. rossii* and *E. dives*, some with hollows and even a pardolote nesting site. There were massed displays of *Swainsona sericea*, *Bulbine bulbosa*, *Brachyscome dentata*, *Triptilodiscus pygmaeus*, *Dillwynia sericea*, *Mirbelia oxylobioides* and there had been good flowering of *Cryptandra* sp. and *C. speciosa*. We saw a few orchids flowering - *Petalochilus carneus*, *Microtis parviflora*, *Diuris semilunulata*, *D. sulphurea* and many, many *Thelymitra* in bud. Other plants of interest were *Thysanotus patersonii* (in the end many were flowering), *Lissanthe strigosa*, *Bulbine glauca* (flowering), *Pimelea glauca* and *Acacia melanoxylon* as well as many others.
