

Wednesday Walk - Hutchinson Place Property, Burra – 27 May 2015

The property is between Burra and Williamsdale with a northerly aspect and a steep southern hill. The trees were magnificent - some were huge and there were many seedlings as well - *Eucalyptus bridgesiana* and *E. melliodora* mainly with *E. pauciflora*, *E. rubida* and *E. stellulata* seen on the drive in. There were also many *Allocasuarina verticillata*, some with impressive numbers of cones. There were many *Cassinia longifolia*, a few *C. quinquefaria*, *Hibbertia obtusifolia*, *Brachyloma daphnoides*, *Bursaria spinosa*, *Dodonaea viscosa* ssp. *angustissima* but we probably spent most time looking at the smaller things, adding to our list - *Glycine tabacina*, *Desmodium varians*, *Opercularia hispida*, *Scleranthus diander* (& *S. biflorus*), *Solenogyne dominii*, *Asperula conferta*, *Clematis leptophylla*, *Stackhousia monogyna* among others. There were not many flowers - a few *Wahlenbergia* ? *communis*, *Vittadinia cuneata*, *V. muelleri*, *Hibbertia obtusifolia*, *Astroloma humifusum*. The views were wonderful from the top, as was the old convict built boundary wall. We had a rather steep descent after lunch at the top and spent some time in a grassland area and around a lovely dam, adding a few more species to the list.
