

## Wednesday Walk in Nadgigomar Nature Reserve (south) – 8 October 2008

Nadgigomar Nature Reserve (south) is to the north of Braidwood and is accessed by Euradux Road. We parked at the entrance to the Reserve and walked the fire trails to eventually get to the Shoalhaven River. It was mainly through dry woodland and one open swampy area. We recorded a vast array of plants and saw many of them flowering. Of particular interest were: *Daviesia acicularis*, *Dillwynia acicularis*, *Hibbertia calycina*, *Kennedia prostrata* – all flowering – and *Persoonia microphylla*, *Jacksonia scoparia* and *Xanthorrhoea concava*.
