

## Wednesday Walk – Nadgigomar Nature Reserve (South) – 8 July 2015

Nadgigomar Nature Reserve (south) is to the north of Braidwood and is accessed by Euradux Road. We parked at the entrance to the Reserve and managed to do a loop walk on fire trails plus a track which linked the 2 main trails. We were surprised at how sandy it all was and felt as if we were walking on a beach a lot of the time. We started off in forest of *Eucalyptus sieberi*, *E. viminalis* and a few *E. rubida* and *E. dives* with *Allocasuarina littoralis*. The second half of the walk was in white trunks - *E. mannifera* and *E. rossii* with a few *E. pauciflora* and not many *A. littoralis*. There was a whole range of "different" plants that we don't often see and it took a while to recognise them again - *Lomandra glauca*, *Xanthorrhoea concava*, *Patersonia longifolia*, *P. sericea*, *P. glabrata*, *Daviesia acicularis* and *Kennedia prostrata* to name a few. We were surprised to find a *Calotis cuneifolia* close to the start of the walk where we parked. We were pleasantly surprised by large numbers of *Acacia terminalis* flowering - some very pale ones through to deep golden. Also flowering were *A. ulicifolia*, *Boronia algida* (just a few) and *Mirbelia platylobioides* (just a few). One species puzzled us for a while but someone finally spotted a flower and it was a *Phyllanthus* yet to be IDed. Interesting finds were populations of *Pomaderris ferruginea* and *P. ledifolia* which we haven't recorded there before - both in bud. Other additions to our list were *Acacia falciformis*, *Omphacomeria acerba*, *Polyscias sambucifolia* and *Pomax umbellata*. Slightly annoying were some trail bike riders and evidence of high usage, perhaps explaining the amount of sand we found ourselves walking in.

For the images below: FM = Fran Middleton, MB = Martin Butterfield

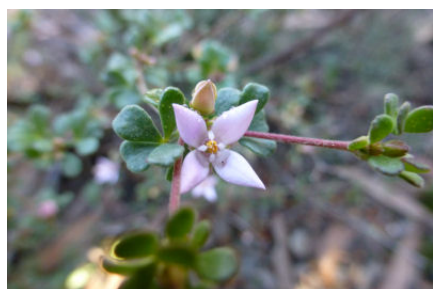

General habitat MB

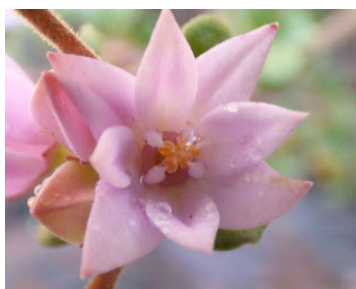

*Acacia terminalis* golden FM

*Acacia terminalis* pale MB

*Boronia algida* FM

A "double" *Boronia algida* MB

*Acacia decurrens* MB

*Patersonia sericea* MB

*Mirbelia platylobioides* FM

*Eucalyptus rossii* trunks MB

## Plant List for Nadgigomar (South) – 8 July 2015

? indicates that those present were unsure of the plant name

Acacia ? deanii	Kunzea parvifolia
Acacia decurrens	Lepidosperma ? gunnii
Acacia falciformis	Lepidosperma laterale
Acacia mearnsii	Lissanthe strigosa
Acacia parramattensis	Lomandra filiformis ssp. filiformis
Acacia terminalis	Lomandra glauca
Acacia ulicifolia	Lomandra longifolia
Allocasuarina littoralis	Lomatia ilicifolia
Aristida ramosa	Melichrus urceolatus
Astroloma humifusum	Microlaena stipoides
Austrostipa densiflora	Mirbelia platylobioides
Austrostipa sp.	Omphacomeria acerba
Banksia marginata	Patersonia glabrata
Billardiera sp.	Patersonia longifolia
Boronia algida	Patersonia sericea
Bossiaea buxifolia	Persoonia linearis
Calotis cuneifolia	Persoonia mollis ssp. leptophylla
Cassythia sp.	Phyllanthus sp.
Cheilanthes austrotenuifolia	Pimelea linifolia
Coronidium oxylepis ssp. lanatum	Polyscias sambucifolia
Daviesia acicularis	Pomaderris andromedifolia
Daviesia leptophylla	Pomaderris ferruginea
Daviesia mimosoides	Pomaderris ledifolia
Dianella revoluta	Pomax umbellata
Dillwynia sericea	Poranthera microphylla
Echinopogon sp.	Pteridium esculentum
Eucalyptus dives	Pultenaea microphylla
Eucalyptus macrorhyncha	Pultenaea subspicata
Eucalyptus mannifera	Rhytidosporum procumbens
Eucalyptus pauciflora	Schoenus melanostachys
Eucalyptus rossii	Stackhousia monogyna
Eucalyptus rubida	Stylidium graminifolium
Eucalyptus sieberi	Stypandra glauca
Eucalyptus viminalis	Veronica calycina
Exocarpos strictus	Wahlenbergia stricta
Gompholobium minus	Xanthorrhoea concava
Gonocarpus tetragynus	
Goodenia hederacea	
Greenhood rosettes	
Hakea laevipes	
Hardenbergia violacea	
Helichrysum scorpioides	
Hemarthria uncinata	
Hibbertia calycina	
Hibbertia obtusifolia	
Hovea heterophylla	
Hydrocotyle laxiflora	
Indigofera australis	
Kennedia prostrata	
Kunzea ericoides
