

## Wednesday Walk in Reserves Near Oallen Ford - 4 May 2011

We travelled to the Oallen Ford area via Bungendore, Tarago, Cullulla Road, Sandy Point Road and Oallen Ford Road. Before crossing the ford, we stopped at the northern area of Crown Land and explored the western side first as far as the creek gully and followed it for a while. We then crossed the road and did a loop back to the cars. There was an interesting array of plants and several which we were unable to identify. Of interest were *Acacia brownii*, *Aotus ericoides*, *Banksia paludosa* and *B. marginata* (both with flowers), *Caustis flexuosa*, *Lomandra obliqua*, *Olearia ? viscosa*, *Pomaderris betulina* ssp. *betulina* and many more. We had lunch at the Shoalhaven River where we saw *Grevillea arenaria* and *G. juniperina* surrounded by African Lovegrass - *Eragrostis curvula*. We then explored the Crown Land south of the ford where we found mostly the same vegetation including an interesting prostrate, suckering form of *Acacia brownii*, *Acacia dawsonii* and *Acacia uncinata* (flowering).
