

## Wednesday Walk on Orroral Ridge, Namadgi National Park – 18 February 2009

Orroral Ridge Road (off Apollo Road) in Namadgi National Park climbs up to a ridge overlooking the Orroral Valley. There are spectacular granite boulders, excellent views, a cave to explore and easy walking through regenerating vegetation following the 2003 bushfires. We have been monitoring the regeneration on each visit and added a few extra species to our list this time. The highlight was seeing *Lobelia denticulata* in flower. Also flowering were *Cassinia longifolia*, *Brachyscome rigidula*, *B. spathulata*, *Cynoglossum australe* and *C. suaveolens*.
